

NEW VALVE SOLUTION

GRUVLOK
An ASC Engineered Solution

FEATURING

Offset-disc Design and Patent-pending Flow Technology

Two-piece Bolted Body Design

Compact Base Handle Design

Optional Stainless Steel Disc

Integral Mounting Base

400 psi Pressure Rating - 25% higher PSI rating than competitive options.

NOW IN STOCK

Gruvlok® Series 8700

Offset-disc Butterfly Valve for Mechanical and Plumbing Applications

Product Description

- Designed for use in commercial, grooved-end piping systems supporting water, hydrocarbons and compressed air services.
- EPDM and Nitrile seals available
- Available in Sizes from 2" – 8" with an operating Pressure Rating for dead-end service up to 400 psi
- Manufactured to meet or exceed the requirements of MSS SP-67.
- Compliant with ISO 5211 for Gear Operator or Handle Actuation
- Can be Lever- or Gear-operated or ordered with a bare stem.

Product Benefits

- Allows for low operating torque while providing a bubble-tight seal from full vacuum to 400psi.
- Valve is fully field-serviceable
- Handle design saves space. Gear operator option also available
- 25% Higher pressure performance than competitive options available – can help with system design optimization
- Mounting base allows for minimum of 2" of pipe insulation
- Stainless disc option provides max temp rating of 250°F, 10% higher than peer industry options.
